

Assessment-Based Learning

Team Vivid provides assessment-based learning, such as the popular Meyers Briggs Type Indicator, DiSC and other tools. We are qualified practitioners to administer assessments and offer a number of courses to guide leaders and teams to interpret results and build lasting capabilities.

Assessments provide a “launch pad” for teams to get in depth quickly and engage in meaningful discussion. Further, they provide an ongoing basis to measure and assess growth over the years. Based on wide global acceptance by organizations, our assessment frameworks have high applicability and portability.

Team Vivid provides several types of customization for these courses.
