

## Leading in a Postmodern World

There is an emerging disconnect between leaders and staff that cannot simply be explained as a “generational gap”. Inherent in the Postmodern mindset are tensions that challenge historically-held management beliefs and assumptions:

- ❖ The “entitlement mentality”
- ❖ Dealing with the priority of self-esteem over results
- ❖ Harnessing the impact of social networking
- ❖ Shifting motivations around work and business
- ❖ The power of the “experience” economy
- ❖ The instant credibility of skepticism
- ❖ Understanding the full impact of the digital revolution
- ❖ The effects of relativism on productivity and culture

Learn to harness these emerging dynamics of the global ecosystem. This requires moving beyond traditional leadership practices and focusing on understanding today’s workforce. Team Vivid equips you with the mindset and tools to lead in today’s complex marketplace.
